Continuation of 11. does NOT place the application in condition for allowance because: Regarding the section 112, second paragraph rejection of claims 9, 25, and 26, the examiner maintains that the limitation refered to in the final office action comerning the above claims does not adequately describe what "on a basis of the driving profile" refers to. Based on the claim language as recited it is unclear as to whether "on a basis of the driving profile" refers to blooks or releases the existing operating states of the operable device; or whether actual driving situation is damgerous or non-dangerous; or both. Regarding claims 10 and 27 Hardouin teaches a device as claimed. Regarding claims 9 and 25-26 the combination of Hardouin and Han teach a device as claimed. Hardouin clearly teaches an operable device with multiple operating states that may be produced or changed independently from each other and those operating states can be produced or changed by a user through the user interface (see col. 1, lines 57-67). Hardouin also clearly teaches using driving speed data to determine vehicle-specific conditions by determining changes or fluctuations of driving speed to block or release operating states of the operable device (see col. 2, lines 11-15, 17-20, 29-38), Applicant's reply has overcome the rejection of claims 9-10 and 25-27 under 35 U.S.C. section 112. first baragraph.
